

DUVALE PLC CASE STUDY

New Council Offices - Barnsley

BRIEF

Barnsley Council were looking for something different to divide up their new meeting space. They needed a system with good acoustic properties and that provided a good solid dividing wall, but which also gave the feeling of space.

Our GS100 Double Glazed sliding folding partition was just the job. Along with all the top hung Duvale range, the GS100 requires no floor track allowing seamless tiling on the meeting room floor. This was a must, so as to be in keeping with the rest of the newly refurbished office.

SPECIFICATION

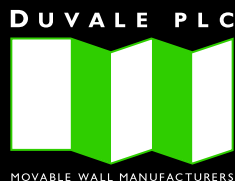

- Our Type GS100 Double Glazed folding partition system.
- Fully Glazed Faces.
- Twin Point Suspension for side parking, Full height fixed pass door at one end.
- Manifestation applied to glass faces.
- Internal blinds are optional (not required).

TESTIMONIAL

“Duvale PLC’s type GS100 glazed partitions are one of the major features of our new meeting facilities. The clean lines and modern looks are perfect for what we were trying to achieve here. I was also amazed at how user friendly the system is. We would not hesitate to use Duvale in our future projects.”
