

Palace Mall Project - Brunei

BRIEF

In August 2004, **Duvale** were commissioned by BTS Interiors Ltd (on behalf of their clients TSL Construction Sdn. Bhd.) to design and supply 6 metre high panels for installation in the banqueting hall of the Palace Mall in Brunei, Malaysia. BTS are our UK distributors who specialise exclusively in overseas projects

Due to the weight and height of the walls in this Palace project, Duvale developed a new, heavy duty head track and trolley system.

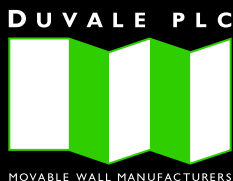

SPECIFICATION

- 2 sets – Top Hung Acoustic Movable Wall type 100.
- Each set 24800mm wide 6000mm high comprising 21 no. basic panels and 1 no. telescopic panel.
- Sound attenuation RW50db lab test.
- Finish supplied in Raw MDF for on site decoration by others. Vertical edge profiles to each panel. Gold anodised finish.

TESTIMONIAL

“Both *BTS Interiors* and *Duvale* have provided us with a superb service from first meeting to finished installation. We could not have asked for a more courteous and professional partnership to have undertaken this very exacting working. We are absolutely delighted with the benefits that this partnership with *Duvale* and their agents *BTS Interiors* have given us.” TSL Construction Sdn. Bhd.
